

Swix Workbook

FW 24/25
Technical Apparel

A photograph of two cross-country skiers on a snowy slope at night. The skier in the foreground is wearing a red and white jacket and black pants, leaning forward in a racing stance. The skier in the background is wearing a white and black jacket and black pants, also in a racing stance. The background shows a snowy mountain slope with some trees and a small light source. The overall scene is illuminated by a soft, ambient light, possibly from a headlamp or a nearby light source.

SWIX TRIAC DRY BREATHE LONG SLEEVE M

10089-23

Swix Triac Dry Breathe Long Sleeve M is the perfect baselayer for cross country skiing with racing intensity. It is constructed with 4 different materials for great body mapped performance and comfort. Stretch, quick dry and moisture-wicking performance is key. Partly made with Repreve®-polyester recycled fiber (ocean bound plastic bottles). The bottles are collected within 50K of coastlines in countries or areas that lack formal waste or recycling systems. The product is perfect to use in combination with a jacket and a vest for those colder days!

- For the ones who wants the best
- Keeps you dry and warm even on high intensity workouts
- Dries quickly
- Use it as a single layer, or as the next layer over a baselayer
- Designed for racing
- A slim fit round neck baselayer with total 4 different materials for great body mapped performance
- It is constructed with a high stretch main material that is quick dry and has a moisture-wicking performance with a brushed backing for extra comfort
- Partly made with Repreve® recycled fiber which is ocean bound plastic bottles that are collected within 50K of coastlines in countries or areas that lack formal waste or recycling systems
- Stretch cuffs at bottom sleeve opening for great comfort

Sizes: S - XXL

Main Material: 86% Polyester Recycled, 14% Elastane Second Material: 70% Polyester Recycled Repreve® Our Ocean, 30% Polyester Panel: 70% Polyester Recycled Repreve® Our Ocean, 25% Polyester, 5% Elastane

SWIX TRIAC AIR MESH VEST M

11331

Swix Triac Air Mesh Vest M is made for those who likes to keep a comfortable temperature, for when you are exercising hard and require extra insulation. Lightweight and stretchy, this cross-country skiing vest made with Schoeller® Air Mesh™ which has a “3D mesh” design that enables ventilation and helps to regulate your body temperature in high intensity training. The mesh construction traps air inside the vest that will insulate and keep you warm while allowing ventilation through the open design. The vest has a front zipper, is comfortable on the neck with its brushed inside and has stretch panels on the sides and back - made for athletes or those seeking supreme performance for competition and training.

- Training vest
- A thermal vest for cold training days.
- Easy to adjust the temprature
- Fits underneath the cross-country jacket
- Snug fit - full mobility
- Low-weight insulation
- Schoeller® Air Mesh™
- Optimal ventilation and warmth
- High level of stretch in all directions
- Works well as a training vest in winter

SWIX TRIAC LIGHT GLOVE M

H0941

Swix Triac Light Glove Mens is a thin and lightweight cross country ski glove specifically adapted to the Swix Triac 3.0 ski pole. The upper part of the glove is shaped in the same way as the pole strap so that the glove and strap are experienced as one. This part of the glove consists of Schoeller® air mesh material which is breathable and also cushions the pressure of the strap against the hand. The cuff has a silicone print so that the Triac Jacket's cuff will adhere to the glove. This is a slim fit model with a tight elasticated cuff and thumb gusset with stretch thumb technology to maximize movement around the ski pole. The palm has durable synthetic leather with silicone for extra grip. The glove is perfect for high intensity training, skiing on mild winter days, and for roller skiing or training sessions in autumn and spring.

- Racing gloves for ski races and hard training
- Schoeller® air mesh material that ventilates and cushions
- Silicone print on cuff for better adhesion to the Triac Jacket
- Stretch thumb technology for optimal movement
- Durable synthetic leather
- Optimized for the Triac 3.0 ski pole!
- Well-designed with a good fit

SWIX TRIAC WARM GLOVE MITT

H0450

The two most popular gloves in the Swix portfolio are combined in this glove to create the most optimal training and competition glove ever! The Triac Warm Glove has received much honor and praise and has been hailed by many as the best on the market ideal for racing on cold days. This glove is now with a light and thin cover wind mitten, which can be easily removed or hidden away in the cuff as required. When folded away, it does not interfere with the ski pole strap. The mitten retains warmth extra well and protects against cold wind, and is fantastic before the start or on longer ski marathons where the cold can be a problem in higher areas.

- Ski gloves
- Ski glove with wind cover
- Warm and highly technical racing glove
- Ponetorto® No-Wind™ main fabric
- Wind-resistant super-lightweight cover that can be tucked away in the cuff
- PrimaLoft® Gold 100 gm/sqm thermal lining on the back of the hand
- Premium 0.8 mm synthetic leather with silicone application for good grip
- Schoeller® air mesh panels
- Elastic thumb gusset for maximum flexibility in the grip
- Unisex

Backhand: 71% Polyester/ 29% Polyurethane Palm: 55% Polyester/ 45% Polyurethane (0.4mm) Out shell: 100% Polyamide Cuff: 88% Polyamide/ 12% Elastane Lining: 100% Polyester

SWIX TRIAC GTX INFINIUM OVER MITT

H0390

Swix Triac GTX Infinium over mitt is truly a unique product, designed and developed by Swix this is an overmitt worn over racing gloves or training gloves. The great thing is that they are also worn on the outside of the pole straps! Anyone who exercises in the cold should own a pair of these, at least if your hands freeze before you manage to warm them up. When you've got going, you can easily remove them and put them in a pocket or a waist belt. Once you've got used to using them though, it's hard to do without them.

- Mitten
- Made of fast-drying polyester
- Gore Tex® Infinium™ windproof, water-repellent and breathable technology
- For wearing over a thinner glove and the ski pole strap at the same time for extra wind protection and thermal insulation
- Easy to put on and take off with one hand
- Practical fleece fabric on thumb
- Anatomical fit with stretch fabric
- Reflective details
- Unisex

""Backhand: 100% Polyester Palm: 80% Polyester/ 20% Polyurethane (0.75mm) Cuff: 100% Polyester""

SURMOUNT SOFT SHIELD PANTS W

22486

Surmount Soft Shield Pants W are made for the active alpine ski tourer. The outside of the main fabric is wind and water repellent, and the inside is brushed to keep you warm. The fabric is highly breathable, but will still keep the cold wind out. The pants have a zipper fly and detachable suspenders. The waist has Velcro adjustments on each side. The bottom leg has reinforcement fabric at the inseam position. There are four zippered pockets and at the side seam there is a long zipper opening that can also be used for ventilation. The leg opening is adjustable with snap buttons. The knees have darts sewn in for an articulated fit.

PACE PANTS M

10043-23

Pace Pants are a pair of technical running pants, with functional details. The pants are made with a regular waist and tapered leg. This garment is made from a 4-way stretch quick drying main material, with elastic lycra in the back section. Both fabrics ensure high moisture absorption. The construction includes slightly articulated knees and an inseam gusset to keep you comfortable during longer runs. Made with two zippered hand pockets, these pants are ideal for outdoor activity. Among the features are reflective details to keep you visible in the dark.

- Two different fabrics to ensure high moisture absorption
- Reflective details
- Intended for various activities, intensities or weather conditions, depending on individual preference
- Tight Fit- See Product Specification Bullet Points for full garment details
- Tight to regular fit, with a tapered leg
- Two zippered hand pockets
- Quick dry materials
- Constructed with an inseam gusset for better movement.
- The waistband features an inner elastic and flat drawstring
- Reflective details for better visibility

Sizes: S-XXL

Main Material: 71% Polyamide, 29% Elastane Panel: 82% Polyester, 18% Elastane

COLOR

Dark navy - 75100
Plum - 80954

PACE HIGH WAIST TIGHTS W

10035-23

Pace High Waist Tights W are constructed with a comfortable four way stretch material, to provide you with energy and power when running. Key features include a zippered back pocket and an accessible slip pocket, positioned at the left thigh. For enhanced movement, this garment is constructed with an inseam gusset. The back knee section uses a punched stretch fabric for extra air flow. To provide function and comfort, the knee section is constructed in a slightly articulated shape. The tights are designed with reflective details to make sure you are visible in the dark.

- Tight fit for a body-hugging feel
- Deep pocket on left thigh and zip pocket on the back
- Reflective details
- See Product Specification Bullet Points for full garment details
- Tight fit with a high waist construction.
- Features an elastic and a flat drawcord inside waist to adjust the width if needed
- Designed with a slip pocket and a zippered back pocket
- Inseam gusset for better movement
- Punched lycra panel on the back of the knee for better airflow
- Reflective details for better visibility

POWDER GLOVE

H0813

Powder Glove is our warmest cross country glove, perfect for colder days. Features a long cuff, high PrimaLoft® insulation on the back of the hand and slightly less PrimaLoft® insulation in the palm. In addition, it has windproof material on the back of the hand and strong durable synthetic leather on the palm. The glove can resemble a slalom glove, but it is much lighter and is easily compressed under the ski pole strap. Most importantly: It keeps cold hands warm.

- Gloves
- Top insulation with additional PrimaLoft® padding
- This glove keeps cold hands warm.
- Windproof material on the back of the hand and synthetic leather on the palm.
- Lighter than it looks!
- Unisex fit
- Long cuff

Sizes: 6-10

BLIZZARD GLOVE

H0730

Blizzard glove is a technical and functional ski glove in a classic, retro design. Water-repellent, genuine leather is a good choice for a ski trip, as it breathes well and molds itself to the shape of your hand during use. Technical and elastic lining material with moisture-transporting lines. The three traditional and visible pin-tuck seams are a classic detail that reduces the volume in the hand and provides a better fit for a glove that does not get too tight over the knuckles.

- Technical ski gloves for cross-country skiing and ski touring
- Breathable and durable materials
- Very suitable for easy-pace cross-country ski trips and Nordic ski touring
- Pin-tuck – traditional glove stitching that reduces the volume around the hand and allows movement around the knuckles
- Articulated fit with stretch fabric
- Real leather that molds to your hand with use.
- Real goatskin in the palm that molds to the hand with use
- The main material is from an Italian premium supplier and is stretchy, windproof and highly breathable!
- PrimaLoft® Gold lining on the back of the hand
- Fully lined with brushed, moisture-transporting lining material

Sizes: 6/S-11/XXL

""Backhand: 85% Polyester/ 15% Elastane Palm: 100% Leather (0.75mm) Cuff: 96% Polyester/ 4% Elastane Lining: 100% Polyester""

ENDURE XC SOCK EXTRA LIGHT

50123

Endure XC sock extra light is a quartet of cross country skiing socks where each color is suited to different temperatures. The properties are differentiated by different yarn compositions and panels with different knitting structures and thicknesses. Since most of the heat loss occurs under the foot, the warmest version has a full terry sole and a high wool content. The second warmest version still has a high wool content, but is without full terrycloth, yet well suited for cold days. The next sock in the range has a lower wool content but this gives better sweat transportation on cold days where the thicker socks will feel too warm. The least warm version contains Coolmax yarn which offers a high degree of sweat transportation.

- Socks
- Socks for different temperatures, designated by color.
- For use with ski shoes or skating shoes.
- For both serious skiers and recreational skiers.
- See other product details for more info
- The least warm version contains Coolmax yarn which offers a high degree of sweat transportation.
- Four versions designated by color, from warm to less warm and with better sweat transportation
- Choose your color according to the temperature like you do with ski wax:
- Yarn composition and knitting technique adapted to the different parts of the foot
- Extra cushion for the heel cap
- The rib structure suits both high-arched feet and flat feet
- Terrycloth foot sole
- Extra cushion for the heel cap
- Designed specifically for cross-country skiing

Sizes: 37-39, 40-42, 43-45,46-48

Main Fabric: 74% Polyamide/23% Polyester/3% Elastane

COLOR
Swix red - 99990

HARNESS FOR KIDS

XT613

Swix Pulling Harness is suitable for parents with kids aged 2-5 years old. It gives an adult control over the kid on the alpine slope and also enables a pleasant cross-country skiing trip without the kid becoming exhausted. The Swix Pulling Harness consists of a belt bag with a kid's harness and a 5.5 m long band with a practical hook at each end. The band has a combined handle with an elastic part. The handles are practical on the alpine slope and the elastic part prevents the kid from experiencing sudden jerks when being pulled by the adult.

- Take the kids on a skiing trip
- For parents with kids aged 2-5 years.
- Equally suitable for cross-country and alpine skiing
- Convenient for both adults and kids
- Consists of a 5.5 m long band with a practical hook at each end.

If a glove is too small, it will be uncomfortable. But if your ski or snowboard glove is too big, your hand will have a hard time warming up the inside. So selecting the correct glove size is important.

How to measure for a glove:

For best results, take measurements of your width and length. Most gloves sizes are determined by width but some people have long fingers. Select your glove size to whichever is longer. When between sizes, go up a size.

How to measure for a mitten:

Take measurements of your width and length. Because mittens have more room, width is the most important measurement.

Junior glove sizing:

Please note that when junior and adult sizes overlap, junior fingers tend to be shorter and more narrow than adults. Since Juniors and Toddlers can vary significantly in size, we recommend using an age guidelines opposed to actual measurement of the child's hands and fingers.

NTS

NTS - Next to skin

This fit is patterned to follow the body shape closely to enhance moisture management, thermal efficiency and to feel comfortable under layers.

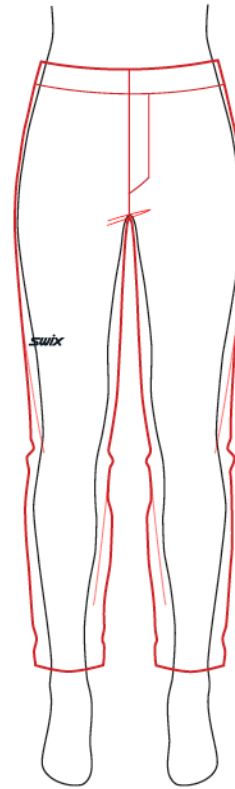

SLIM

SLIM

This fit stays close to the body without being too tight. It's low profile eliminates bulk and moves with the body without restrictions. Fits a base layer underneath.

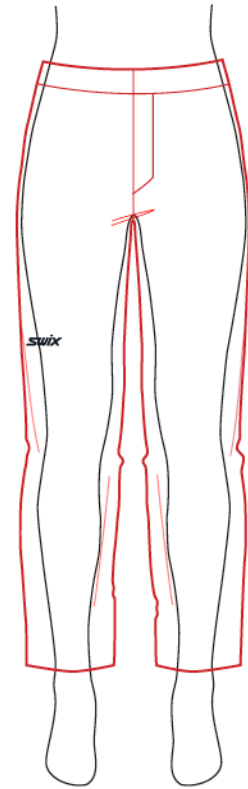

REGULAR

REGULAR

Comfortable fit that allows freedom of movement. It still provides shape but has room for extra layering.

RELAXED

RELAXED

This fit is cut loosely. Offers comfort and freedom of movement and allows for extra layering.

A female triathlete is shown in profile, standing on a snowy slope at night. She is wearing a black puffy jacket, black leggings, and a black headband with a headlamp. The headband has the Swix logo and a small light. The jacket has the Swix logo on the sleeve. The leggings have the Swix TRIAC logo on the thigh. The background is dark with some distant lights.
